

Meeting 8/11-17

Present: Oscar, Adam, Rasmus, Felix, Lisa, Josefin

The next week's schedule

Wednesday 10-12

Wednesday 13-17

How do you feel about the group?

Overall the group feels things are going very well. However, everyone has agreed to work harder to include everyone in the conversation.

Have you run into any problems?

The description for assignment 2 is really vague so we'll need to ask for help during the supervision tomorrow.

What progress have you made?

We have started with the component diagram.

Discuss last week's assignment

Do this after the supervision.

Room bookah

Lisa is bookah

Questions for the next supervision

- *Lecture tomorrow (10.11.)? Not in PingPong schedule, but in TimeEdit*
- *When is the next assignment going to be released?*
- *Are any of the assumptions from our first assignment wrong?*
- *Multiplicity in Papyrus?*
- *Current component diagram: detail level acceptable?*
- *No API for faults?*
- *No API for time steps?*
- *Can a point be multiple times in the mission path?*
- *Can physical areas contain logical areas?*
- *More specific definition of an area? When is it a physical/logical area? Can there be a portion of the environment that doesn't have a physical area? Can physical areas exceed the environment boundaries?*
- *Are all areas square-shaped? Or can they be differently shaped?*
- *Subclasses (PhysicalArea / LogicalArea)?*
- *Subinterfaces (Walls / Boundaries)?*
